Installation Instructions

Use 9/16" socket to remove the front (2) seat bolts from the driver seat.

Use 9/16" socket to remove the front (2) seat bolts from the passenger seat.

Set floor plate in-between seats.

Insert (2) 5/16" bolts in each side of the floor plate side rails.

Attach floor plate legs to each side of floor plate with provided hardware, finger tighten nylock nuts to allow movement.

Slide floor plate legs into the correct position, anchor them to the inside seat bolts closest to the transmission hump.

Use 9/16" socket to secure (2) inside front seat bolts on driver and passenger seats.

Use 9/16" socket to tighten (2) outside front seat bolts on the driver and passenger seats.

CONTINUED ON BACK...

Secure the (4) nylock nuts to the floor plate side rails with a 1/2" socket.

Assemble the desktop stand to the mount base, starting with the vertical tube. Use clover knob to secure vertical tube to mount post.

Place articulated swing arm over the 5/8" end of the telescoping rod. Tighten with ratchet handle. Attach desktop to end of articulated swing arm and secure by tightening ratchet handle.
